

# SUPPLY CHAIN SUSTAINABILITY

Signaling Our Values in Supply Chain

**LOCKHEED MARTIN**

## Our Supply Chain Sustainability Strategy

Sustainability illustrates how Lockheed Martin pursues innovation with purpose. We believe sustainability is not only core to our business, but also to our supply chain. Sustainability efforts are bucketed into three core areas: Environmental, Social, and Governance (ESG). Our five-star strategy spans across each of these core elements

- ▶ Address emerging sustainability themes to foster risk management
- ▶ Extend resources to the supply chain, leveraging agreements and best practices to build capability
- ▶ Enhance supply chain sustainability due diligence
- ▶ Create pathways for supply chain visibility and traceability
- ▶ Reframe sustainability to be considered throughout the industry

## Buying Tomorrow . . . Today

The actions we take today to support sustainability have a direct impact on what tomorrow looks like. As a global supply chain, we have a responsibility to address sustainability. There needs to be the foresight to take steps today to ensure we contribute to a sustainable tomorrow.

A sustainable supply chain has far-reaching benefits by reducing the amount of resources utilized and ensuring methods in both production and operations can be sustained. Collaboration and engagement with our suppliers and industry partners powers our ability to advance sustainability and build resiliency to external risks.

ENVIRONMENTAL

SOCIAL

GOVERNANCE

## What Can You Do?

### Environmental

- ▶ Utilize our [Sustainable Packaging Guidelines](#) when shipping
- ▶ Understand how you align with our [Go Green 2030](#) initiative and view our [Go Green video](#)
- ▶ Establish a company-wide baseline and reduction goals for carbon emissions, facility energy use, water consumption and waste.
- ▶ Get a free energy audit for your building from the [Department of Energy Better Buildings Program](#) (dependent upon eligibility criteria).
- ▶ Send environmentally preferable product information to [sustainability.lm@lmco.com](mailto:sustainability.lm@lmco.com)

### Social

- ▶ Analyze your international supply chain against the [Department of State Trafficking in Persons Report](#)
- ▶ Provide your sustainability success stories to [sustainability.lm@lmco.com](mailto:sustainability.lm@lmco.com)

### Governance

- ▶ Ensure understanding of our [Supplier Code of Conduct](#)
- ▶ Take advantage of our free [Ethics Webinars](#)
- ▶ Benchmark your company against the free [SPLC Sustainability Benchmark Tool](#)

## Sustainability Industry Partners

Check out these organizations for free resources and explore opportunities to be involved.

- ▶ [Aerospace Industries Association \(AIA\)](#)
- ▶ [Department of Energy \(DoE\) Better Plants Program](#)
- ▶ [International Aerospace Environmental Group \(IAEG\)](#)
- ▶ [IPC Association Connecting Electronics Industries IPC 2-18K](#)
- ▶ [Responsible Minerals Initiative \(RMI\)](#)
- ▶ [Sustainable Purchasing Leadership Council \(SPLC\)](#)

## Visit us on the Web!

To stay up to date with new sustainability resources, we invite you to check out [Supplier Wire](#), a dedicated site for suppliers. For awareness of our Sustainability mission and, please visit Lockheed Martin's Sustainability [webpage](#). For examples of how we pursue innovation with purpose, visit the [annual report webpage](#). Feel free to check out the latest success story and provide one for your company as well by emailing [sustainability.lm@lmco.com](mailto:sustainability.lm@lmco.com).
