

LEGION POD®

LEGION POD[®]

Lockheed Martin. Your Mission is Ours.[®]

Legion Pod is a multi-function sensor system that supports collaborative targeting operations in radar-denied environments. Flexible by design and in production now, Legion Pod is set to serve as the next sensor system of choice for fixed-wing aircraft.

FEATURES

- Long-range IRST21[®] sensor system
- Passive detection and ranging of airborne threats
- Large field of regard
- In production
- Flexible design to accommodate additional sensors
- Transportable across fighter and non-fighter aircraft
- Networking and processing for collaborative targeting operations

SPECIFICATIONS

- Diameter 16 in
- Length 98.5 in
- Weight < 550 lbs
